**I can:use electricity in machines**

# plenary

How is it used in every day machines

# S2S

- Look at the sheet
- Read the instructions
- High light the important information
- Make the machine

# Traffic light

You will need

- 3 lights
- 3 batteries
- 6 wires
- Green, red and amber cellophane
- A box

1. Cut 3 holes in the box

2. Cover each hole one of the Green, red and amber cellophane

3. Then create three circuits making sure that the lights are underneath the Green, red and amber cellophane
